DETAILED ACTION

Drawings

The drawings are objected to because in figure 2, component 202 the output signal label "1" should have been "I". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is

Art Unit: 2611

requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

Claims 1 – 4 are objected to because of the following informalities:

In claim 1, line 5, recite the limitation “ to filter a reference quadrature signals” should have been “to filter a reference quadrature signals with a second low pass filter”.

Claim 1, line 6 recite the limitation “ gain adjusted output signals” should have been “filtered gain adjusted output signals”.

Claim 1, line 6 – 7 recite the limitation “ filtered quadrature signals” should have been “filtered quadrature reference signals”.

Claim 1, line 8, recite the limitation “quadrature gain adjusted output signal” should have been “quadrature-phase filtered gain adjusted output signal”.

Regarding claim 4, line 3, recite the limitation “it with a quadrature sinusoidal source” should have been “the input signal with reference quadrature signals generated from a quadrature sinusoidal source”.

Claim 4, line 7 recite the limitation “the in-phase and quadrature-phase” should have been “the filtered in-phase and filtered quadrature-phase”.

Claim 4, line 9 recite the limitation “the filtered quadrature signals” should have been “the filtered reference quadrature signals”.

Claim 4, line 10 recite the limitation “ quadrature filtered reference signal” should have been “quadrature-phase filtered reference signal”.

Appropriate correction is required.

Claims 2 and 3 are inherently objected as being depended on above objected claims.

Allowable Subject Matter

Claims 1 – 4 are allowable over prior art of record.
